PORTFOLIO

portfolio.noamfal12.workers.dev

Selected work in rendering, shaders, technical art, and tool development

PROFILE

Technical Artist and Game Developer focused on rendering, shader development, and tool development. Builds custom 2D/3D rendering systems, WebGL/WebGPU graphics applications, game-engine systems, and external tools for artists and game designers. Combines programming and visual development to solve technical problems, automate repetitive tasks, and improve content creation and iteration workflows.

TECHNICAL SKILLS

GRAPHICS & RENDERING	Shader development, WebGL, WebGPU, 2D/3D rendering, custom rendering systems
PROGRAMMING	C#, C++, C, Java
ENGINES & FRAMEWORKS	Unity, Unreal Engine 5, Godot, MonoGame
TOOLS & WORKFLOWS	External tools for artists & game designers, workflow automation, production utilities

SELECTED TECHNICAL WORK

- Rendering & Engine Systems**
Built custom 2D/3D rendering frameworks and engine systems using MonoGame in C#, plus rendering work in C++.
- WebGPU / WebGL Graphics**
Built browser-based graphics applications with WebGL and WebGPU, including custom shader-driven rendering.
- Technical Art & Workflow Tools**
Created shaders, visual systems, and external tools for artists and game designers to automate repetitive tasks and speed up content creation and iteration.

EXPERIENCE

- IT Technician - Panorama Optics**2021 - 2024
 - Installed, maintained, and troubleshoot Windows workstations, hardware, software, and local network infrastructure.
 - Configured CCTV networks, switches, and VLANs; assembled and repaired PCs.
- Israel Defense Forces - Northern Command**2018 - 2021
 - Computer Lab Administrator**
 - Maintained computer networks; installed and repaired servers; diagnosed hardware and software issues on PCs and IoT devices.
 - Communications Systems Technician**
 - Operated military communications systems across bases in northern Israel.
 - Military training:** Network Administrator Course; Communications Systems Technician Course.

EDUCATION

- Game Development** - Tiltan College, Haifa | 2024 - 2026
- Two years of study focused on programming, game engines, databases, and SQL.
